# SYNOPSIS:

Society has collapsed. A global pandemic has brought a troubled world battling climate change to it's knees. The Government, already rife with corruption, systemic racism and no regard for the well being of it's people or the planet, has developed a secret program to restore law & order quickly turning a free society into an autocratic controlled state. The masses are under constant surveillance, tracked by drones. Protestors are quickly collected and never heard from again. Those that defy the new world order are killed where they stand.

Asher "Ash" Dunn, once a world renowned falconry expert for creating the first working prosthetic bird wing, and his daughter "Izzy" are among the many survivors who yearn for the days of peaceful living without fear of death by virus or autonomous killing machines. Each day is a struggle to avoid being tracked as they live off the grid at their secluded ranch continuing his life's work of rehabilitating birds of prey.
